

Getting started in the MSAMM Academy

8 August 2026

Your account is ready. The Academy teaches Oracle Fusion and E-Business Suite implementation, and finishing a course opens the door to the MSAMM internship.

Finding and buying a course

Every course lists its chapters and lessons before you buy, and some lessons are free to preview. Prices are shown in the currency of your market on the course page.

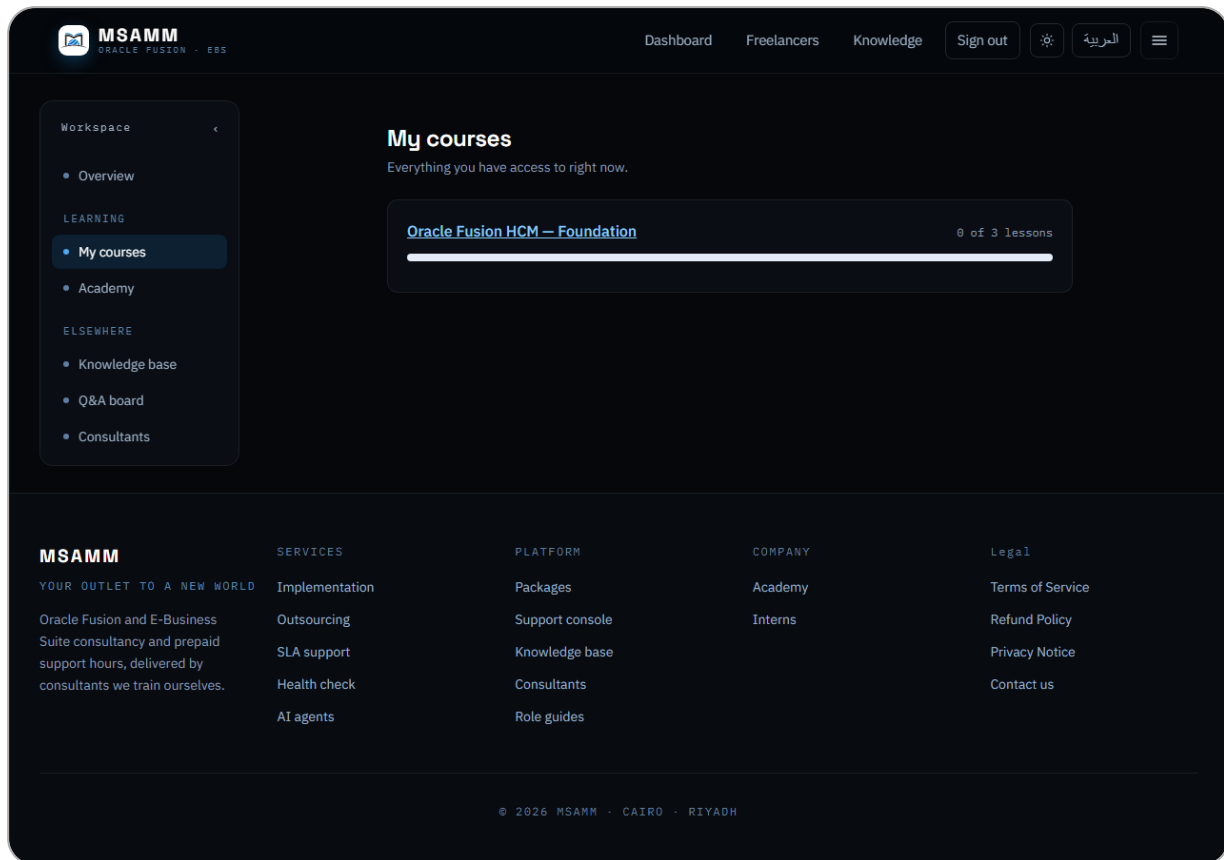

The course catalogue. Open any course to see its chapters and its free preview lessons before buying.

Working through it

Lessons are grouped into chapters and your progress is saved as you complete them. Your courses and where you left off are on the My courses page.

Some courses have a short quiz at the end of a lesson as well as a final assessment. Where a quiz exists, it has to be passed before the course counts as finished.

Your My courses page — everything you are enrolled in, and where you left off in each.

The assessment and your certificate

The final assessment unlocks once you have completed the lessons. Pass it and a certificate is issued with a code anyone can verify on a public page — that page shows your name, the course and the score, so do not sit the assessment if you would rather it were not published.

Live sessions

MSAMM schedules live classes on the tracks it teaches. If you have access to a published course on that track you are emailed when one is scheduled, and it appears on your My courses page. The room opens shortly before the start.

Asking questions

The Q&A board is open to everyone signed in and consultants answer there. It is public, so leave anything confidential out of what you post.
